Mars On The National Mall

18–19 October
9 am–5 pm
12th St. Walkway, National Mall

As part of AGU’s Centennial celebration, Arizona State University (ASU) will display the world’s largest map of Mars on the National Mall 18–19 October. The map is the size of a basketball court, and was made by combining more than 24,000 images taken by ASU’s THEMIS camera onboard NASA’s Mars Odyssey satellite.

Walk on Mars alongside ASU scientists to explore Martian geography and learn about the history of Mars exploration.
